RONALD PARFAIT KAMAHA KAMAHA

Nairobi, Kenya | ronaldkamaha2@gmail.com | LinkedIn | pkamaha.github.io

EDUCATION

BSc Epidemiology and Biostatistics · United States International University–Africa (USIU-Africa) *Sep 2022 – Sep 2026*

CGPA 3.591 / 4.0, *Cum Laude* · Mastercard Foundation Scholar · Dean's List, 8 semesters

Thesis: *Interrupted Time-Series and Counterfactual Analysis of Maternal Mortality in Kenya, 2018–2025: A Comparison of Routine and Audited Surveillance Data*

PROFESSIONAL EXPERIENCE

Attachee, Disease Surveillance and Response · Kenya National Public Health Institute, Ministry of Health *Jul 2026 – Aug 2026*

- Completed IDSR certification (WHO Health Security Learning Platform) and a three-day Ebola Virus Disease emergency response training, including PPE donning/doffing and ambulance-based patient handling
- Critically appraised three outbreak investigation reports, including a 129-case outbreak in two girls' schools in Kakamega County, and developed case definitions
- Analysed a visceral leishmaniasis outbreak dataset, comparing mortality across treatment regimens
- Joined the MOH, KNPHI and Africa CDC assessment of national digital surveillance systems (ADaM, m-Dharura, KHIS) using a profiling and gap-analysis tool

Attachee, Public Health Department · Kenyatta University Teaching, Referral and Research Hospital *May 2026 – Jun 2026*

- Investigated an Mpox outbreak end to end: contact tracing, specimen collection, line listing and descriptive analysis presented to the Public Health Team
- Inspected 20 wards and units for infection prevention, waste segregation and environmental health; collected borehole water samples for quality testing
- Reported notifiable conditions, including tuberculosis, severe acute malnutrition and a neonatal death, using MOH IDSR tools
- Designed a proposed monitoring and evaluation tool to track recurring inspection findings and follow-up actions

ACN Ambassador and Research Fellow · Africa Career Networks · AL for Health *Jan 2025 – Present*

- Developed *The Shadow Burden*, a research proposal using Bayesian hierarchical zero-inflated negative binomial modelling with BYM2 spatial effects (R-INLA) to estimate unobserved maternal mortality across Nairobi's 85 wards
- Coordinated with 8 affiliate organisations to connect students with professional opportunities

RESEARCH

- **Maternal mortality in Kenya, 2018–2025:** interrupted time-series and counterfactual analysis comparing routine (KHIS2) and audited (MDSR) surveillance data. BSc thesis, 2026; ISERC and NACOSTI approved.
- **Armed conflict and malaria exposure in Cameroon, 2010–2024:** a spatiotemporal framework built on a novel Conflict Exposure Index and panel difference-in-differences design (ACLED, Malaria Atlas Project, WorldPop). In progress.
- **The Shadow Burden:** estimating unobserved maternal mortality in Nairobi's informal settlements. Research proposal, AL for Health Research Fellowship FY2026.
- **Ongoing:** predicting cholera in Kenya's informal settlements and in Cameroon's Far North using environmental covariates; mapping where pregnancy peaks and malaria season coincide in Cameroon.

LEADERSHIP & COMMUNITY IMPACT

Chief Operating Officer · KET Foundation, Cameroon (remote) *Joined Sep 2021 · COO since Sep 2023*

- Lead operations of a digital education platform reaching 5,000+ high-school students, including the move from WhatsApp groups to ket.academy (GCE preparation, AI-assisted learning, digital libraries)
- Manage production of 100+ academic resources and 90+ instructional videos; built team workflows, KPIs and a regional ambassador network

Founder & Lead · Batoukop Diagnostic Initiative, West Cameroon *Dec 2024 – Dec 2025*

- Secured about $1,000 to equip the village clinic with a microscope, centrifuge, haemoglobin analyser and test kits
- Ran a one-month free testing clinic for 38 residents, producing the community's first prevalence data: 58% malaria positivity, 71% Widal positivity, 5% severe and 28% mild anaemia; recommended follow-up and confirmatory testing

Project Lead · Action for Change · Kibera Initiative, with Angaza Foundation *Apr 2023 – Jan 2024*

- Secured seed funding and trained 28 young mothers in bookkeeping and mobile hair braiding; the group generated $500 in compounding profit within three months before full handover
- Equipped a youth football team as a crime-diversion programme; the team won the Kibera league three months later

Electoral College Representative · School of Pharmacy & Health Sciences, USIU-Africa *Sep 2024 – Sep 2025*

- As a team of three, pushed through a mandatory Hepatitis B vaccination policy, vaccinating an initial 84 high-risk students
- Organised a four-day blood drive with the Children Sickle Cell Foundation and the Red Cross Club, collecting 200+ pints; secured fee interest waivers for affected students

Chairperson (Founding Secretary) · USIU-Africa EpiBio Club *Sep 2023 – Jun 2026*

- Built a mentorship and placement link with the Center for Epidemiological Modelling and Analysis (CEMA); led a GIS workshop on predicting cholera in informal settlements; organised Ebola and Mpox awareness drives

Founding Secretary General · Mastercard Foundation Scholars Mentorship Program *Jun 2023 – Aug 2024*

- Co-designed and scaled mentorship reaching 1,500+ high-school students across 15 schools in 5 Kenyan counties

CONFERENCES & ACTIVITIES

- **Panellist,** "The Future of Healthcare in Africa: Beyond the Hype", AL for Health Network Gathering, African Leadership Academy, Kigali *Sep 2026*
- **Delegate,** Africa Health Tech Summit 2026, Kigali, Rwanda *Sep – Oct 2026*
- **Institutional visit,** Center for Epidemiological Modelling and Analysis, University of Nairobi *May 2025*

TECHNICAL SKILLS

Modelling: Bayesian hierarchical models (R-INLA), zero-inflated count models, interrupted time series, counterfactual and ARIMA forecasting, conflict exposure indexing, GIS

Field epidemiology: IDSR surveillance, outbreak investigation, contact tracing, case definitions, infection prevention and control

Tools: R (tidyverse, terra, fixest), Microsoft Office

Languages: French (native), English (native)

ACHIEVEMENTS

- Mastercard Foundation Scholar, USIU-Africa · Dean's List Honoree, 8 semesters
- SDG Innovation Challenge Winner, Melton Foundation · Alumnus and Finalist, Aspire Institute
- Regional Excellence Awardee, GCE Ordinary Level (2019) and Advanced Level (2021)
- Recognition award, Electoral College Representative 2024/2025 · Bronze medallist, university swimming
